

## The Car of the Future?

*Завдання.*

*Вставити наступні пропущені слова.*

*even, today's, dirty, wheels, than, easy to, it, tell, can, there, silent, faster, from, now, this, ever, maybe, today's, experimental*

This car is the opposite of  cars;  cars are noisy and , this one is  and clean. Today's cars have , this one does not. It moves like a snail, but much faster  a snail !

This car will use electric energy, not petrol or gasoline; it will have batteries that  be recharged instantly from chargers in the road. It will also be very \_  drive.

In fact, you won't need to drive it; it will drive . You will just need to  the computer: "Go to X" and the car will go . Also, it will reach X very quickly, much  than today's cars. It will also be very safe and comfortable.

A lot of the technology already exists, but it is

very . Already today scientists are developing new materials for the surface of roads: In fifty years   perhaps sooner, some new roads will capture solar energy : they will store  energy under the road, and some cars will be able to use it.

However you probably won't  drive a "snail car",  if you're under 20 today. This, perhaps, is the car of the year 2100, the car that your grandchildren will  drive.
